

## **AG-400 OrganaGro® Planter Mix**

AG Organics OrganaGro® Planting Mix is a pre-moistened blend of carefully selected organic compost, aged forest products and premium peat moss which is formulated for all landscape planting applications.

The organic compost adds beneficial nutrients to the top soil. Thoroughly composted wood products prevent rapid fiber breakdown along with the highest quality peat moss is used for its water retention features.

This complete planting mix may be used for ground cover planting, flowers and vegetable gardens, roses, trees, plant container, shrubs, shade plants, turf areas along with acid loving plants. AG-400 OrganaGro® Planter mix is rich in organic nutrients to maintain a long lasting healthy plant.
