

## **AG-140 PREMIUM FOREST COMPOST**

AG-140 Premium Forest Compost is a composted leafy green product. Premium Forest Compost will help neutralize the pH in soils along with enhancing soil fertility by adding essential nutrients to the soil. This will allow for stronger root growth and healthier plant material. Ideal uses are as a soil amendment to native soils or in soil blends. Premium Forest Compost can also be used with or without added fertilizers for sports field over-seed and turf areas. Being a 1/2" minus compost, Premium Forest Compost will help aerate soils and will increase drainage when added.

AG-140 Premium Forest Compost is produced in compliance with USCC (United States Composting Council) Standards and meets the criteria of CHPS (Collaborative for High Performance Schools) requirements for approval as well as Green Book and Caltrans Specs.
