

AG-314 CLASS A TOPSOIL

AG-314 Class A Topsoil is a screened sandy loam soil that is free of debris and toxins. Our Class A Topsoil has been screened to a 1/4" minus material and weighs approximately 110 lbs. per cubic foot on a dry weight basis. This is an all-purpose soil product, which is considered a premium product due to its purity. Ideal use for this product is for any and all standard planting and backfilling.

AG-314 meets the criteria of CHPS (Collaborative for High Performance Schools) requirements for approval as well as Green Book and Caltrans requirements.

GENERAL APPLICATION:

Remove unfavorable existing soil and replace with AG-314 Class A Topsoil. We recommend adding appropriate fertilizers to the soil at the time of planting.

INGREDIENTS:

- Screened Virgin Topsoil

PARTICLE SIEVE :

Sieve Size	Percent Passing
50.00 mm	100%
25.00 mm	25% - 100%
6.3 mm	65% - 100%
