

AG-400 OrganiGro® Planter Mix

OrganiGro® Planter Mix is a pre-moistened blend of carefully selected materials such as, OrganiGro® compost, peat moss, pumice, washed nursery sand and sandy loam topsoil. AG-400 is formulated for all landscape planting applications such as ground cover planting, flowers, vegetable gardens, container plantings, shrubs and trees.

Thoroughly composted wood products that prevent rapid fiber breakdown along with the highest quality peat moss are used for its water retention features. AG-400 OrganiGro® Planter Mix contains the nutrients and minerals needed to establish root growth and to maintain long-lasting healthy plant life.

INGREDIENTS:

- OrganiGro® Compost
- Peat Moss
- Pumice
- Washed Nursery Sand
- Sandy Loam Soil
